REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior of record, because none of the references in alone or in combination discloses:

A method for redirecting optical energy between two optical waveguides, comprising:

- collimating a beam of optical energy from a first optical waveguide with a first aspherical lens;
- directing the beam towards a reflector;
- changing direction of the beam with the reflector at a predetermined angle;
- sizing the beam with a second aspherical lens to a size appropriate for a second optical waveguide; and
- directing the beam away from the second aspherical lens in the second optical waveguide, as discloses in claims 13 and 18.

The method is disclosed above is critically, since it can maximize the optical energy between two optical waveguides and minimizing any back reflection or other optical return loss.
